

JUSTRITE® **New!** Product

ESSENTIALS

Sure-Grip® EX Hazardous Material Safety Cabinets

Ensure full regulatory compliance when storing hazardous materials

Exclusive Benefits

Self-Closing Doors

Required on all Hazardous Material Cabinets, the enclosed self-close mechanism provides obstruction-free access to top shelf space. Self-indexing doors close in sequence to ensure a tight closure from top to bottom.

U-Loc™ Door Handle

Flush-mount Sure-Grip® handle comes with installed cylinder lock and key set. Accepts optional padlock for added security.

Haz-Alert™ Reflective Labeling

Firefighter friendly warning labels reflect with high visibility when illuminated with a flashlight. As required by code, cabinet must be labeled "Hazardous—Keep Fire Away".

Application Specific Labels

Choose from a packet of 10 chemical specific labels, and apply to indicate contents of the cabinet. (See choices below.)

Required in 42 states

Complies with:
NFPA 1 Fire Code 2012
NFPA 400 Hazardous Materials Code 2013
IFC 2012
Shelves meet ANSI MH28.1

Justrite's Hazardous Material Cabinets come in standard 30-, 45-, 60-, and 90-gallon (114-, 170-, 227-, and 341-liter) sizes, as well as Compac, Countertop, Undercounter, and Piggyback styles; select models are ChemCor® lined for added protection from harsh chemicals. Designed to meet FM, NFPA, and IFC standards, these cabinets feature an all-welded, 18-gauge (1-mm) steel, double-walled construction, with 1½-inch (38-mm) air space and a 2-inch (51-mm) leakproof sump. Self-close doors include fusible links at top corners that can be used to hold doors open. The fusible links melt at 165°F (74°C) to release doors and allow them to automatically close under fire conditions.

All models have the same quality features as Justrite's flammable cabinets including: dual vents, grounding wire connections, SpillSlope® adjustable shelves, three-point self-latching doors and leveling feet. Popular 30-gallon (114-liter) cabinet also includes an extra polyethylene work tray that can be placed on top of cabinet for a handy work surface. Non-ChemCor® lined cabinets also include polyethylene trays that sit on top of galvanized steel shelves and a separate polyethylene liner for the bottom sump. The liner can be removed for easy cleaning of drips and leaks. An all-epoxy, baked-on powder coat finish, inside-and-out, provides increased chemical resistance. Ten-year warranty.

Label pack includes ten content specific labels.
Affix label for your application.

Code No. 3550 (1/1/13)
